DESIGNED BY  
SÉRGIO BATISTA

The armchair features a design that evokes the elegance and strength of Ipê trees, with curved, organic lines that resemble the contours of Brazil's tropical forests.

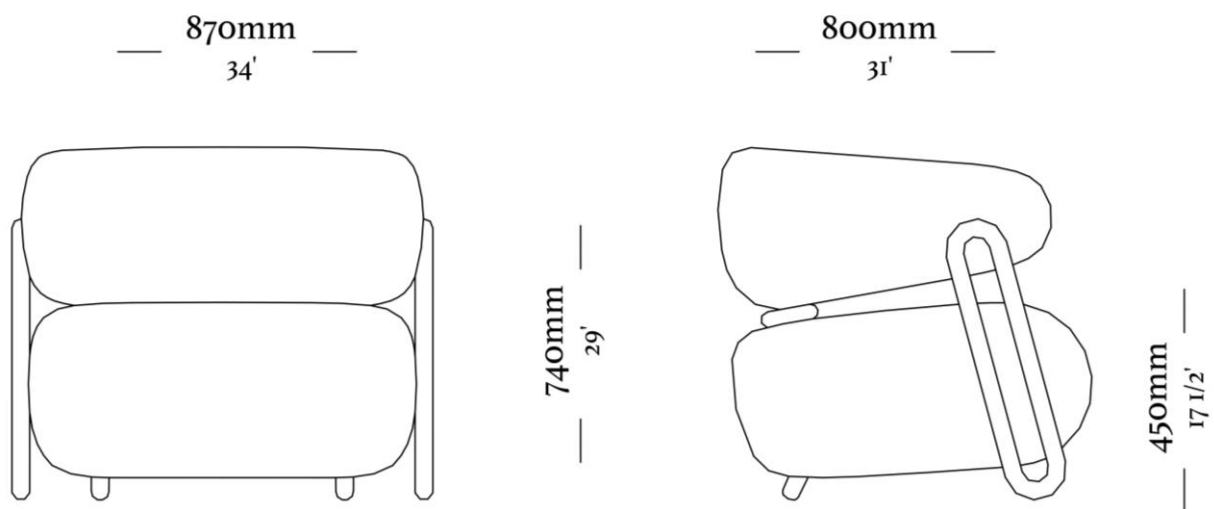

## STRUCTURE

*The structure is made of carefully selected high-quality solid wood. The comfort layers include elastic straps and medium-density foam in the seat, while the backrest features high-resilience foam. The solid wood details are present on the sides.*

## FINISHES

*Finishes and coatings are available according to the price list. There is a wide variety of finishes and coatings to create unique pieces.*
