TALHA

DESIGNED BY
ESTÚDIO UULTIS

TALHA

Between circle, cone, and sphere, the Talha side table emerges through essential forms that transcend centuries, where strength and delicacy coexist. In symbiosis, the piece unites the geological time of mineral with the contemporary gesture of metal, affirming the meeting of materials without hierarchy—only permanence.

STRUCTURE

The bases of the Talha side tables are composed of volumes crafted in solid wood or MDF. The metal top, connected to the base by slender metal rods, establishes a refined dialogue between the natural presence of the base and the contemporary expression of metal.
