RITMO

DESIGNED BY
SÉRGIO BATISTA

RITMO

Rhythm transforms repetition into language and presence. Wooden slats create a visual cadence, establishing intervals that guide the eye across the piece. Metal traces the structure with lightness while wood contributes density and permanence, resulting in a composition that pulses with quiet balance.

STRUCTURE

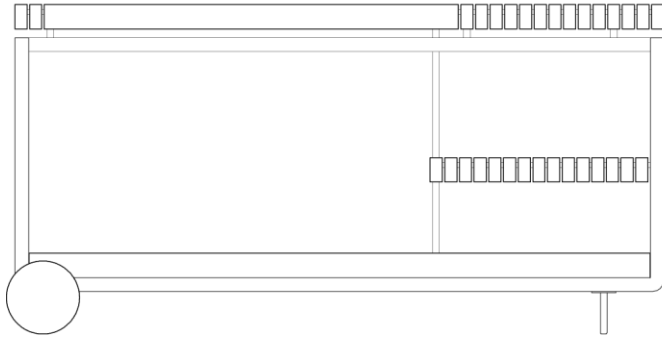

The Ritmo console combines solid wood with metal rods, forming a structure that defines the character and identity of the piece.

FINISHES

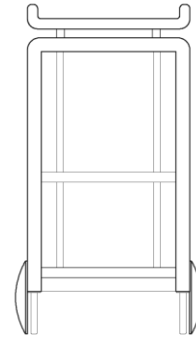

See price list for available finishes.
