TANGENTE

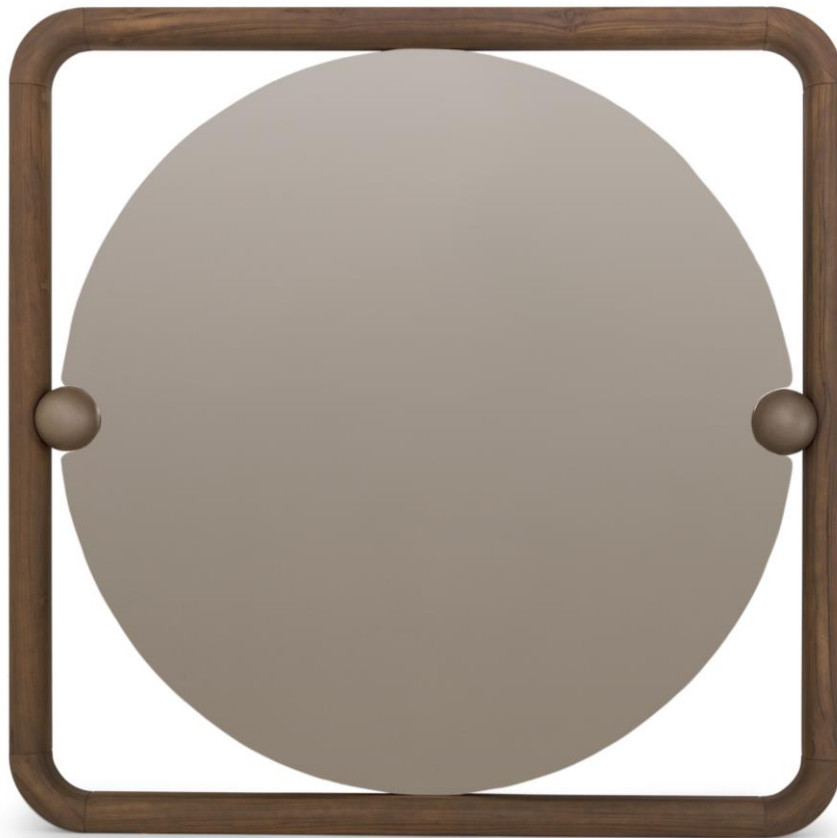

DESIGNED BY  
ESTÚDIO UULTIS

# TANGENTE

---

Throughout the history of art, the circle and the square have symbolized opposing forces seeking equilibrium. From this dialogue emerges the Tangente mirror: a circle suspended within a wooden square and supported by two spheres. In this composition, geometry reveals its tension through balance and proportion. Tangente translates this historic vocabulary into an object of everyday use. Wood introduces warmth, the spheres anchor the structure, and the mirror dissolves boundaries—creating a contemplative dialogue between matter and reflection.

## STRUCTURE

*The Tangente mirror features a solid wood frame. A polished mirror is supported by an MDF backing and secured to the frame through two wooden spheres.*

## FINISHES

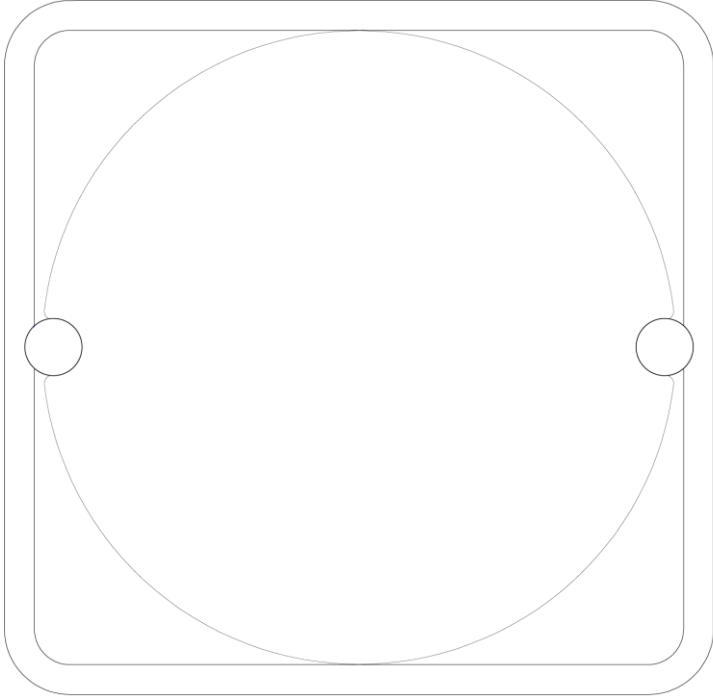

*See price list for available finishes.*
